Anti-Draft Chamber

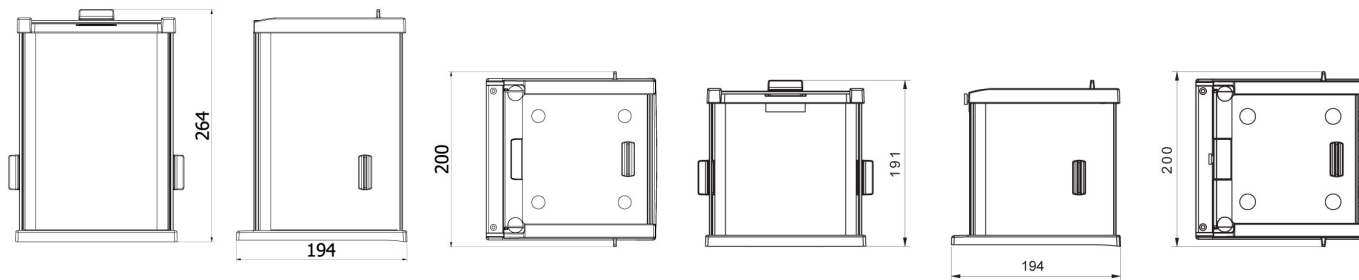

The drawings, photos and graphics used are for illustrative purposes only.

Genel Açıklama

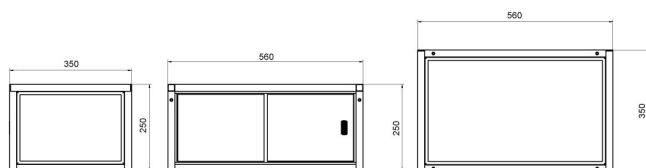

An additional anti-draft chamber dedicated for mass comparators APP KO series. It is intended for instruments operating in unfavourable conditions (air movement, air gusts). The anti-draft chamber is installed on a weighing table, and a mass comparator is placed inside the chamber. The chamber features slidable side and top glass doors, thus ensuring free access to mass comparator's weighing chamber. All components of the anti-draft chamber are made of metal and glass with conductive coating for eliminating influence of electrostatics on a measurement result.

Cihaz boyutları

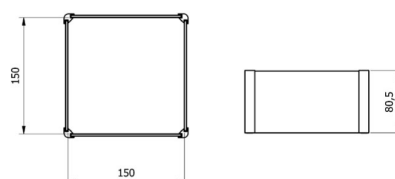

Anti-draft chamber for balances with 128x128 mm weighing pan

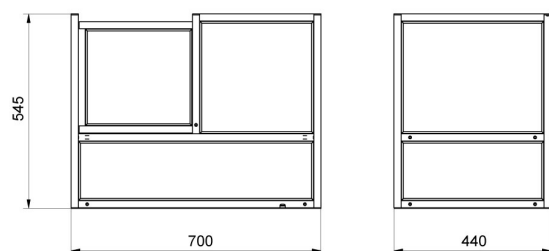

Anti-draft chamber for X2 and R2 precision balances

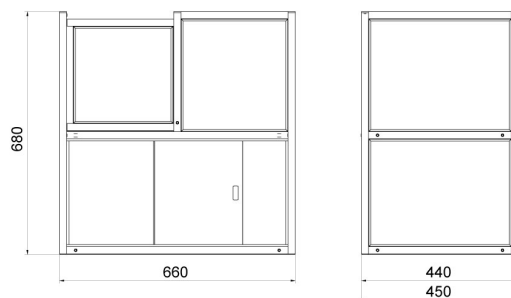

Anti-draft chamber for microbalances

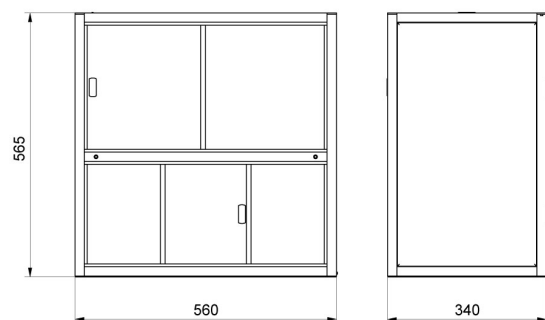

Draft shield for precision balances

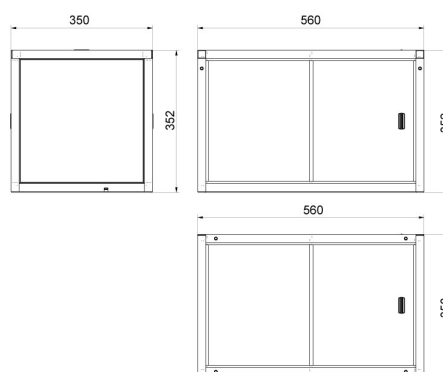

Anti-draft chamber for APP-00-SK mass comparators

Anti-draft chamber for APP-KO-SK mass comparators
